

## POSTDOCTORAL POSITION

### **Biomarkers of Fetal Alcohol Syndrome**

College of Science and Technology, Biology Department

A NIH-funded postdoctoral position is available immediately to study the transcriptional regulation of neuronal cell fate by ethanol (*Ogony et al., 2013 Stem Cells & Development; Sanchez-Alvarez et al., 2013 PLoS One*). Candidates should have a background in Developmental Biology, and experience in embryonic stem cells, cell culture, and RNA techniques. Additional experience in Bioinformatics is preferred.

Candidates should forward a CV, research statement and names/contact info of three references to [Eleni.Anni@Temple.edu](mailto:Eleni.Anni@Temple.edu)
