Apply now!

The World Hellenic Biomedical Association (WHBA) is inviting applications for the 6th Summer School in Medical & Biosciences Research & Management that is taking place at Neo Itilo, Lakonia and Athens, Greece on May 14-22, 2017.

Applications can be submitted online (www.whba1990.org) during the period of November 4, 2016 - January 8, 2017.

This is an annual educational activity of the WHBA. The aim of the Summer School is to foster biomedical science leadership by interaction and instruction with world experts in the most advanced medical and bioscience research areas. The school is designed to cater for undergraduate and graduate students as well as to post-doctoral researchers and physicians in training (residents and clinical fellows). Moreover, it aims to familiarize the students with “actual life” situations that scientists from Academia or the Pharmaceutical and Biotechnology industry deal with on daily basis.

The subject areas of the WHBA Summer School focus on research broadly related to Cancer, Immunology, Cardiovascular Science, Endocrinology, Neuroscience, Novel Technologies, clinical, basic science, bioengineering or biotechnology, and public health problems.

Applications are encouraged from students and postgraduate trainees of all basic biomedical disciplines as well as epidemiological, behavioral and clinical science.

At the time of application, a student applicant (undergraduate and graduate level) must be a medical or biosciences (Biology, Biochemistry, Genetics, Bioengineering, Pharmacy etc.) undergraduate or graduate (MSc, MPhil, PharmD or PhD) student. Post-graduate applicants should actively conduct research or participate in a clinical training program (for physicians in training). At the time of participation in the Summer School, the student applicant may hold a BSc, MD, MSc or PhD degree (for applicants that they are in their final year of undergraduate or graduate studies).

Tuition fee, hotel expenses and transfers between Athens International Airport and summer school location will be supported by the WHBA for all 40 students that will be selected. Selection will be based on merit and academic record as judged by an independent Scientific Board.

Program applicants should be mindful that WHBA reviewers will be based on the following criteria when judging the merit of each application:

1. Academic record of the applicant
2. Awards that indicate academic excellence
3. Original peer-review publications (especially for graduate students and postgraduate trainees)
4. Quality of the statement of purpose regarding future plans of the applicant and use of the English language
5. Extracurricular activities that indicate outstanding service to the community or leadership skills (minor)

**To apply to the program please use the
application found on WHBA's website
[www.whba1990.org/summer-school-
application.html](http://www.whba1990.org/summer-school-application.html)**

**For questions please contact the WHBA
executive board
[http://www.whba1990.org/board-
members.html](http://www.whba1990.org/board-members.html)**

Thank you.

WHBA Summer School application deadline: January 8, 2017.
