

## **Dale E. Wurster Research Award in Pharmaceutics**

Professor Panos Macheras of the University of Athens, Greece has been selected by the American Association of Pharmaceutical Scientists to receive the prestigious Dale E. Wurster Research Award in Pharmaceutics. This high honor is bestowed upon individuals who have made significant research contributions in the specific field of pharmaceutics, encompassing such areas as physical pharmacy, preformulation, dosage form design, formulation, biopharmaceutics and pharmacokinetics. The award will be given at the Opening Session, Sunday, November 2, of the 2014 AAPS Annual Meeting, San Diego Convention Center.

Professor Macheras's continuous pioneering contributions in the pharmaceutical sciences span a wide range from the most basic aspects of pharmacokinetics to the practical applications of pharmaceutical technology and bioengineering. His research work has been published in the best pharmaceutical journals and also in journals beyond the pharmaceutical sciences. The innovative scientific advances made by Panos Macheras truly fall within the spirit of the 2014 AAPS Dale E. Wurster Research Award in Pharmaceutics.
