

National and Kapodistrian
UNIVERSITY OF ATHENS

Postdoctoral Research Position
Department of Pharmacology
Medical School, University of Athens

In the context of the starting European Union FP7 Program entitled “NOX enzymes as mediators of inflammation-triggered neurodegeneration: modulating NOX enzymes as novel therapies”, we have an opening for a Postdoctoral Research Fellow. This is a 4-year position with the possibility of renewal. The project will involve mutation screening, gene expression and protein analysis, molecular mechanism characterization as well as a variety of other approaches. The successful fellow will have the opportunity to participate in an international scientific network involving 12 different teams from Europe and Australia, to use a broad range of different methodologies and technologies, to attend educational workshops and present his/her work at international conferences.

The applicants should have a degree in Biology, Molecular Biology, Biochemistry or other closely related fields, experience in Molecular and/or Cell Biology laboratory techniques, and/or a PhD in a closely related discipline. Prior experience in DNA and RNA analysis will be valuable.

For further enquiries and applications please contact the scientist in charge of the program:

Despina Sanoudou PhD, FACMG CIBiol
Assistant Professor
